Inaya Business Workspace: 6-Month Pilot Programme for Pakistani Companies

Oct 25, 2026 · @Talha Waqas

Summary

We invite your company to a **6-month pilot of Inaya Business Workspace at 30% off**, from **PKR 5,600 per month**, to run your HR, operations, accounting, sales, purchasing and inventory in one secure system.

- **Built for Pakistani businesses:** priced in rupees, paid by bank transfer, supported on WhatsApp in Pakistan business hours.
- **Set up for you:** we create your workspace, import your staff, customers and products, and train your team, at no extra charge.
- **Low risk:** 30% off for the full 6 months, cancel with 14 days' notice, and take all your data with you at any time.
- **Shaped by you:** pilot companies help decide what we build next. One pilot company's suggestion became our classic ERP layout.

Why Pakistani companies need it

Most small and medium companies in Pakistan run on a mix of Excel sheets, WhatsApp groups, paper registers and a separate accounting tool, so nobody sees the whole business in one place.

Today	With Inaya
Staff records and leave in Excel or on paper	Employee records, leave requests and approvals in one place
Customer follow-ups lost in WhatsApp chats	Customers, leads and deals tracked, with a full history
Invoices typed by hand, payments chased by phone	Numbered invoices in minutes, overdue invoices flagged automatically
Stock counted by hand, shortages found too late	Live stock levels with low-stock alerts across warehouses
Important files on personal laptops and USB drives	Encrypted company documents, shared securely and backed up

Today	With Inaya
The owner asks five people to know where things stand	One dashboard showing what needs attention today

What's included

Every package includes all of the modules below, on Windows, Linux and in the browser, laid out like a classic desktop ERP.

Area	What your team can do
People (HR)	Employee records, leave requests and approvals, department managers, org chart, onboarding checklists
Operations	Tasks, projects, departments, approvals, automations, secure chat and video meetings
Accounting	Invoices, expenses, payments, general ledger, financial statements, AI bookkeeping assistant
Sales and CRM	Customers and leads, deals and pipeline, customer support desk
Purchasing	Suppliers, purchase requests, purchase orders, purchasing reports
Inventory	Products, stock levels and low-stock alerts, stock movements, warehouses
Documents	Encrypted files, secure sharing, e-signatures, generated invoices and documents
Admin	Users and roles, company settings, account security, audit trail, activity log

Packages and pilot prices

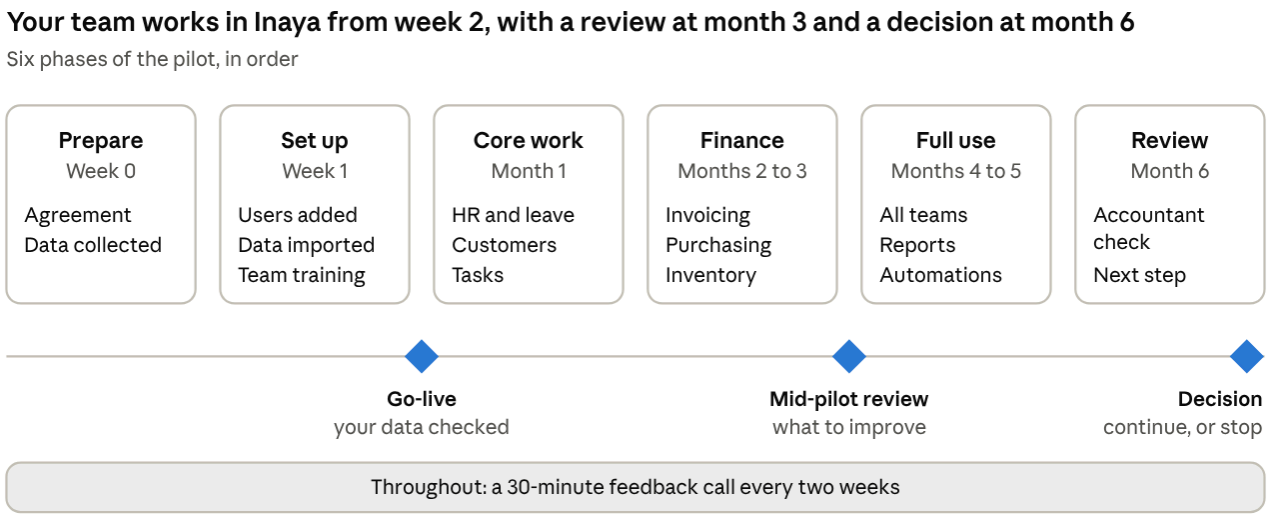

Pilot companies pay **30% less for all 6 months**, and the one-time setup fee is waived. All prices are per company, per month, in Pakistani rupees.

Package	Users	Standard price (PKR / month)	Pilot price (PKR / month, 6 months)	Pilot total (PKR, 6 months)
Starter	up to 2	8,000	5,600	33,600
Professional	up to 5	20,000	14,000	84,000
Business	up to 10	30,000	21,000	126,000
Enterprise	up to 25	60,000	42,000	252,000

- **Extra users:** PKR 2,500 per user per month above the package limit (PKR 1,750 during the pilot).
- **Setup, data import and training:** PKR 10,000 (Starter) or 25,000 (other packages) one time, **waived for pilot companies**.
- **After the pilot:** the standard price applies from month 7. Pilot companies keep that price for their first 12 months after the pilot, and an annual contract costs 10 months for 12.
- **Larger companies:** for more than 25 users, we prepare a custom quote.

How the pilot runs

Your team works in Inaya from week 2. We review together at month 3, and at month 6 you decide whether to continue.

6-month pilot plan · 6 phases, 3 decision points

We start with people and day-to-day work, then move invoicing, purchasing and stock once your team is comfortable. Your accountant compares the figures with your current books before you rely on them.

Data, security, support and payment

Your data stays yours, is encrypted and backed up every day, and we answer urgent issues within 2 hours.

- **Encryption:** documents are encrypted on your own computer before they are uploaded, and every file is kept in two independent storage locations.
- **Backups:** your company's records are backed up daily, and the system is monitored around the clock.
- **Ownership and export:** you own your data and can export all of it at any time. When you leave, we delete it within 30 days of your request.
- **Support:** WhatsApp and email, Monday to Saturday, 10:00 to 19:00 PKT. Urgent issues (the system is down or you can't work) within 2 hours; everything else by the next working day.
- **Payment:** monthly in advance by bank transfer, against our invoice. Prices exclude any applicable sales tax on services.
- **Pilot status:** some features still carry a "Beta" label, and we don't promise a fixed uptime percentage during the pilot. We tell you at least 7 days before any change that affects how you work.
- **Your accountant:** keep your accountant involved for the first months, and run your current books in parallel until the figures in Inaya match.

How to join

Pilot places are limited so that every company gets proper attention. To join, reply with your package choice and we start within a week.

What we ask from pilot companies

- A named contact who decides on setup questions and gathers your team's feedback.
- Your current data in any format: employees, customers, suppliers, products and opening stock.
- A 30-minute feedback call every two weeks.
- Permission to name your company as an Inaya customer once you are happy, for example in a short case study.

Next steps

1. Tell us your package and how many people will use Inaya.
2. We send the pilot agreement and the first invoice.
3. You pay the first month by bank transfer.
4. We book your setup session and your team starts within a week.
